Backlog Term- I Examination- April 2025

Subject Name: E-Commerce

Duration: 1.30 Hrs.

Subject Code: SE-103

Max Marks: 30

Instructions:

1. Please read the questions carefully and attempt your answers.
2. All questions are compulsory.
3. Figures to the right indicate full marks.
4. Use of non-scientific calculator is permitted.

1x5 Marks = 5 Marks

Q1. Answer the following questions in Brief. (5 questions)

1. Define E-Commerce and mention any two differences between e-commerce and traditional commerce.
2. What is meant by a B2C e-commerce business model? Give one example.
3. State any two benefits of mobile commerce (m-commerce).
4. What is conversion rate optimization in e-commerce analytics?
5. Define payment gateway and state its role in e-commerce transactions.
6. What is ONDC (Open Network for Digital Commerce)?

Q2. Read the case study and answer the questions.

(10 Marks)

EasyMart" is a Pune-based online grocery store that sells daily-use products such as fruits, vegetables, groceries, and household items. The company operates on a B2C e-commerce model through its website and mobile app. Customers can browse products, place orders online, choose digital payment options, and get home delivery within 24 hours.

EasyMart uses social media advertising and WhatsApp promotions to attract customers. The company also sends order confirmation messages and discount offers through email and SMS. However, EasyMart has noticed that many customers leave the website without completing purchases. In addition, delayed deliveries occur when popular items go out of stock due to poor inventory planning.

Answer the following Questions

- a) Identify and explain any two e-commerce features or tools used by Easy Mart. (5 Marks)
- b) Suggest two simple measures EasyMart can take to improve customer experience and delivery efficiency.

(5 Marks)

3 x 5 Marks = 15 Marks

Q3. Answer any three questions

1. Explain the value creation and competitive advantage of e-commerce in a digital business environment.
2. Discuss the online consumer buying behavior with reference to personalization and customer experience.
3. Explain any five revenue models used in e-commerce with suitable examples.
4. Examine the applications of e-commerce in online banking or travel and tourism services.

Subject Name: Business Statistics

Subject Code: GC 105

Duration: 2:30Hrs.

Max Marks: 70

Instructions:

1. Please read the questions carefully and attempt your answers
2. All questions are compulsory
3. Figures to the right indicate full marks
4. Use of non-scientific calculator is permitted

Q1. Answer the following questions in brief

5x2 Marks 10 Marks

- a) Explain Univariate Data.
- b) What is Correlation?
- c) What are measures of central tendency?
- d) What is the meaning of Statistics.?
- e) Explain Mean.

Q2. Answer (any two) out of three questions

2x10 Marks = 20 Marks

- a) Calculate Quartiles, Quartiles of Deviation for the following data

Classes:	0 - 20	20 - 40	40 - 60	60 - 80	80 - 100
Frequency:	6	9	12	7	6

- b) Calculate Standard Deviation & Coefficient of Variation.

25,30,20,10,40,50

- a) What is Correlation? Explain the types of correlation.

Q3. Both the Questions are compulsory

2x10 = 20 Marks

- a) Calculate the coefficient of correlation for the following.

Marks in Maths (x): 32 30 20 34 24 36 28

Marks in English (y): 25 35 40 30 25 30 25

- b) Calculate Mean, SD for the following data

Classes :	0 - 10	10 - 20	20 - 30	30 - 40	40 - 50
Frequency:	15	18	27	16	4

Q4. Solve any one question (with internal choice)

1 x 10 Marks = 10 Marks

a. Compute the AM, median and mode from the following data :

Marks.	10-15	15-20	20-25	25-30	30-35	35-40
No of persons.	18	17	22	15	10	8

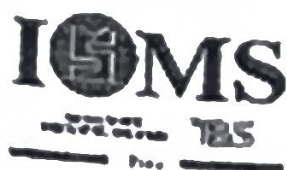

b. Calculate Mean, Median and Mode for the following data

Classes :	0 - 19	20 - 39	40 - 59	60 - 79	80 - 99
Frequency:	5	13	17	16	9

2 x 5 = 10 Marks

Q5. Write Short notes (any two out of three)

- a. Positive Skewness.
- b. Primary Data.
- c. 7 ways of Collecting Data.

4. Use of non-scientific calculator is permitted

1x5 = 5 Marks

Q1. MCQ . Answer the following Questions

1. The full form of BEP is:
 - a. Basic Earning Point.
 - b. Break Even Point.
 - c. Balance Entry Point.
 - d. Business Earning Profit.
2. Which of the following is a current asset?
 - a. Building.
 - b. Machinery.
 - c. Cash.
 - d. Furniture.
3. Profit is calculated as:
 - a. Sales + Cost
 - b. Cost - Sales..
 - c. Sales - Cost.
 - d. Sales - Cost.
4. Which of the following is an example of fixed cost?
 - a. Raw material
 - b. Wages per unit..
 - c. Rent.
 - d. Commission.
5. Cost accounting helps in:
 - a. Profit calculation only.
 - b. Cost control and decision-making.
 - c. Marketing strategy.
 - d. Travel planning.

Q2. Answer the following questions .

a) A company sells notebooks at ₹20 per unit. The variable cost per unit is ₹12, and the total fixed costs are ₹8,000. Calculate the Break-Even Point (BEP) .

b) A company manufactures 1,000 units of a product in a month. The following information is available.

- Direct Material used in production amounts to ₹50,000.
- Direct Labor costs are ₹25,000.
- Direct Expenses incurred are ₹5,000.
- Factory Overheads amount to ₹20,000.
- Administrative Overheads are ₹10,000.
- Selling Expenses are ₹5,000.

Required:

Prepare a cost sheet showing:

1. Prime Cost
2. Factory Cost (Total Production Cost)
3. Total Cost / Cost of Production including Administrative and Selling Expenses
4. Cost per unit

Write all calculations in stepwise format.

c) Explain the Objectives of Managerial Accounting.

d) Prepare Final Accounts from the following Trial Balance:

Particulars	Dr (₹)	Cr (₹)
Capital		40,000
Drawings	5,000	
Purchases	30,000	
Sales		30,000
Wages	5,000	
Rent	2,000	
Salaries	3,000	
Debtors	15,000	
Creditors		5,000
Cash	5,000	
Furniture	10,000	
Total	75,000	75,000

Adjustments :

1. Closing stock at the end of the year is valued at ₹8,000.
2. Wages of ₹1,000 are outstanding.
3. Rent of ₹500 is prepaid.
4. Furniture is to be depreciated at 10% per annum.

15 Marks

Q3) Read case and answer questions based on case.

Case Study: Managerial Accounting Practices at Zenith Manufacturing Ltd.

Zenith Manufacturing Ltd. is a medium-sized company engaged in the production of industrial equipment. Over the last few years, the company has experienced steady growth in terms of sales volume and market presence. However, despite this growth, the management has observed that profitability has not increased proportionately. This has raised concerns among top executives regarding the efficiency of internal operations and the effectiveness of decision-making processes.

The company currently relies heavily on traditional financial accounting reports, which are primarily prepared for external stakeholders such as investors and regulatory authorities. These reports provide historical information but do not offer sufficient insights for internal decision-making. As a result, managers often struggle to make informed decisions related to pricing, cost control, budgeting, and performance evaluation.

One of the major issues faced by Zenith Manufacturing Ltd. is the lack of a structured budgeting system. Departments operate independently, and there is minimal coordination between production, sales, and finance teams. This has led to problems such as overproduction, inefficient utilization of resources, and cash flow mismatches. The absence of proper budgets has also made it difficult to set performance targets and evaluate departmental efficiency.

In addition, the company does not maintain a detailed cost accounting system. Costs are recorded in aggregate form without proper classification into fixed and variable components or direct and indirect costs. This makes it challenging to identify cost drivers and control unnecessary expenses. For example, rising overhead costs have not been analyzed in detail, leading to reduced profit margins.

Another concern is related to pricing decisions. Due to intense competition in the market, Zenith has been forced to reduce prices to maintain its customer base. However, without proper cost analysis and break-even evaluation, the company is uncertain whether its pricing strategy is sustainable in the long run. Managers lack clarity on the minimum level of sales required to cover costs and generate profits.

Performance evaluation is also a weak area in the organization. The company does not use standard costing, variance analysis, or responsibility accounting to assess the efficiency of different departments. As a result, it becomes difficult to identify areas of inefficiency or hold managers accountable for their performance.

Recognizing these challenges, the top management is considering the implementation of a comprehensive managerial accounting system. This would include techniques such as budgeting, cost analysis, break-even analysis, and performance measurement tools. The objective is to improve planning, enhance control over operations, and support strategic decision-making.

However, implementing such a system requires organizational change, employee training, and investment in new processes. There may also be resistance from employees who are accustomed to existing practices. The management must carefully plan the transition to ensure successful adoption of managerial accounting practices.

Questions

1. Explain the role of managerial accounting in improving decision-making within Zenith Manufacturing Ltd. **5 Marks.**
2. Identify and analyze the key problems faced by the company due to the absence of managerial accounting practices. **5 Marks.**
3. What is budgeting? How can it help Zenith Manufacturing Ltd. in better planning and control? **5 Marks.**

Q4. Answer (any one) question

1 x 15 = 15 Marks

a) A company manufactures gadgets and has the following data for a month:

- Selling Price per unit = ₹50
- Variable Cost per unit = ₹30
- Fixed Costs = ₹20,000
- Actual Sales = 1,200 units

Answer the following:

- a) Calculate the Contribution per unit.
- b) Find the Break-Even Point (BEP) in units.
- c) Calculate the Margin of Safety (MOS).
- d) Determine the Profit earned by the company.
- e) Calculate the Profit-Volume (P/V) Ratio.

OR

b) Read case and answer questions based on case.

Break-Even Point (BEP)

GreenPack Pvt. Ltd. is a packaging solutions provider operating in a highly competitive market. The company supplies packaging materials to various industries, including food processing and e-commerce. In recent times, competition has intensified, with new entrants offering similar products at lower prices. To maintain its market share, GreenPack has reduced its selling prices, hoping to increase sales volume.

However, the management is uncertain whether this strategy is financially viable in the long run. While sales volume has increased slightly, overall profitability remains unclear. The company does not have a clear understanding of how many units it needs to sell to cover its total costs. Fixed costs such as rent, salaries, and machinery maintenance remain constant, while variable costs fluctuate with production levels.

The management realizes the need to understand the relationship between cost, volume, and profit. Break-even analysis is being considered as a tool to determine the minimum sales level required to avoid losses. Additionally, the company wants to assess how changes in price, cost, or volume would impact profitability.

There is also concern about the margin of safety, as fluctuations in demand could significantly affect financial performance. Without proper analysis, the company risks operating at a loss despite increasing sales. The management is therefore keen to use break-even concepts to make informed decisions regarding pricing, cost control, and production planning.

Questions:

1. Explain the concept and significance of Break-Even Point in managerial decision-making. **5 Marks**
2. Discuss how break-even analysis can assist in strategic planning. **5 Marks**
3. What is Margin of Safety? How does it help Green Pack Pvt. Ltd. in reducing business risk? **5 Marks**

3 x 5 = 15 Marks

Q5. Write Short notes (any Three)

1. Budgets.
2. Margin Of Safety.
3. Cost Sheet.
4. Accounting concepts.

Q1. Multiple Choice Questions

1x5 Marks = 5 Marks

1. Indicate the topic that falls under macro-economics

- | | |
|---|-------------------------|
| a) Determination of price under monopoly | b) Law of demand |
| c) Output of cotton fabrics in the country. | d) Consumer's behavior. |

2. Utility is commonly defined as the want _____ power of goods or services.

- | | |
|----------------|-----------------|
| a) Destroying. | c) Reducing |
| b) Satisfying | d) Stabilizing. |

3. The law diminishing marginal utility refers to

- | | |
|--|-----------------------------------|
| a) Reduction in utility | b) Reduction in marginal utility. |
| c) Reduction in marginal utility with successive consumption of units of the same product. | |
| d) Falling utility. | |

4. The law of returns to scale apply

- a) Only when all the factors of production are variable.
- b) When some factors of production are fixed and some are variable.
- c) When all the factors of production are fixed.
- d) None of these

5. Direct costs are also called as

- | | |
|-------------------------|----------------------|
| a) Non-traceable costs. | b) Untraceable costs |
| c) Fixed costs. | d) Traceable costs |

5x3 = 15 Marks

Q2. Answer any three questions

- 1) Explain Following Cost with examples –
a) Fixed Cost b) Variable Cost c) Semi Variable Cost d) Total Cost
- 2) Explain oligopoly market along with the features.
- 3) Elasticity of demand and types of it.
- 4) Law of Returns to scale

2x5 = 10 Marks

Q3. Case study or scenario analysis with questions

Maruti Udyog Ltd (MUL) enjoys monopoly in spare parts. Along with dealers, MUL is exploiting Maruti vehicle users. Often the vehicle user has to change the clutch plate twice in six months and has to pay Rs.3,567/-. MUL charges the price of clutch at imported cost while clutch plate is actually made by clutch auto private Ltd at Faridabad. The replacement of a silencer costs Rs.800/-. The cost of spare parts and repairs by any reckoning is three to four times compared to Ambassador or Fiat. A random sample indicates that every eighth car has faulty clutch. In the context of defective parts and exorbitant cost of repairs, saving in fuel in Maruti as compared to other auto makers is of little consequence. Maruti vehicle users in dilemma they cannot get spare parts or get their cars repaired except through Maruti Udyog or its authorized dealers. But both charge huge amounts, not giving guarantee for a single day. MUL is thus, indifferent to the genuine grievances of its customers.

Questions:

- (a) Define a monopoly and state its main features.
- (b) Why is MUL called a monopoly? Does it enjoy monopoly in car manufacture?

Q4. Answer any one question

1 x 10 = 10 Marks

Discuss the Law of Variable Proportion

OR

Define National Income along with methods of measurement of national income.

Q5. Write any two Short Notes

2 x 5 = 10 Marks

- 1) Importance of Managerial Economics
- 2) Circular flow of money
- 3) Determinants of demand

Trimester Examination- Term I Oct. 2025

Subject Name: Organizational Dynamics

4. Use of non-scientific calculator is permitted

Q1. Multiple Choice Questions

1x5 = 5 Marks

1. Which of the following forms the basis for the autocratic model of OB?
 - a) Obedience
 - b) Authority
 - c) Power
 - d) Dependence on boss
2. Organization Behaviour does not include
 - a) An interdisciplinary approach
 - b) A humanistic approach
 - c) Total system approach
 - d) Accounting approach
3. In Maslow's hierarchy needs which of the following pair of needs is ranked as "lower order needs"?
 - a. Physiological and safety needs
 - b. Physiological and social need
 - c. Self-actualization and safety needs
 - d. Social and esteem needs
4. In Herzberg's Two-Factor Theory, hygiene factors are related to:
 - a) Job satisfaction
 - b) Job dissatisfaction
 - c) Motivation
 - d) Self-actualization
5. Which of the following is an example of intrinsic motivation?
 - a) Salary
 - b) Bonus
 - c) Recognition
 - d) Personal growth

Q2. Answer any three questions

- Elaborate the five stages model for Group development
- Explain the causes of organizational change
- Define the causes of organizational conflict.
- Describe Maslow's need of hierarchy.

1x10 = 10 Marks

Q3. Case study or scenario analysis with questions

Unique financial services is a reputed financial company having 10 branches in different part to the country. Its staff included 290 employees and 60 executives. The company has a performance rating plan under which the staff members are rated at the end of each financial year by a committee of three Sr. managers by means of graphic scale. The qualities considered are- responsibilities, initiative, dependability, leadership, Attendance, Punctuality, Teamwork, result, cooperative attitude, knowledge, behaviour, Problem-Solving and Decision-Making. After the performance is evaluated, the rating are discussed with the concerned employees by their immediate boss and are used to counsel them and arrange further training for them. The rating are also used for granting withholding of increment and promoting of merit us staff.

Recently some employees working at Head office have been denied annual increment due to comparatively low rating. They have made a dissatisfaction with the current performance appraisal system and suggested implemented 360 degree appraisal system or 10 % to 15 % lump sum amount as an increment every year.

The CEO feels that performance appraisal should be discontinued thorough out or search for new alternatives like KRA (Key Result Areas)

Questions:

- If you were the HR Manager, how would you defuse the problem?
- How far do you agree with the CEO's view that performance appraisal should discontinued?

Q4. Answer any one question:

1 x 10 = 10 Marks

- With the help of JOHARI window discuss how interpersonal interaction can be made more effective. Discuss with suitable example.

OR

- Explain Kurt- Lewin three stage model of change and how it can be effectively implemented to manage organizational change. Discuss with suitable example.

Q5. Write any two Short notes

2 x 5 = 10 Marks

- Theories of leadership
- Explain the models of Organizational Behavior.
- Reasons for workplace stress.

Q1. Multiple Choice Questions

1x5 Marks = 5 Marks

1. Which of the following statements best defines a statement of profit or loss?

- a) It is a summary of assets and expenses at a specified date
- b) It is a summary of cash receipts and payments made during an accounting period
- c) It is a summary of assets, liabilities and equity at a specified date
- d) It is a summary of income and expenditure for an accounting period

2. Which of the following statements best defines a liability?

- a) liability is an obligation arising from a past transaction or event.
- b) liability is a legally binding amount owed to a third party.
- c) liability is a present obligation of the entity to transfer an economic resource as a result of past events.
- d) liability is anything which results in an outflow of economic benefits from an entity.

3 Which of the following statements best defines an asset?

- a) A An asset is a resource owned by the entity with a financial value.
- b) B An asset is a resource controlled by an entity from which future economic benefits are
- c) expected to be generated.
- d) C An asset is a resource controlled by an entity as a result of past events.
- e) D An asset is a present economic resource controlled by the entity as a result of past events.

4 According to conservatism concept, losses are recorded when

- a) The organization receives bills
- b) The organization receives benefits
- c) The organization makes payment
- d) The organization files tax returns

5. Preparation of cost sheet is a part of

- a) Financial Accounting
- b) Management Accounting
- c) None of the above

Q2. Answer (any three) out of four questions

5x3 Marks = 15 Marks

- I. Explain the concept of Conservatism.
- II. From the following information prepare a statement showing (i) Prime cost (ii) Works cost (iii) Cost of Production (iv) Cost of Sales (v) Net profit of X Ltd. which produced and sold 1000 units in June 2019.

Opening Stock: 24,000

Closing stock: 20,000

Purchase: 80,000

Sales: 2,00,000

Direct Wages: 35,000

Direct Expenses: 2,000

Carriage Inward: 2,000

Carriage Outward: 1,000

Factory Expenses: 4,000

Office Salaries: 15,000

Office Expenses: 12,000

Factory Rent & Rates: 2,500

- III. Using the data in the question given above, there are changes expected in some expenses in next year. Material prices and wages are expected to go up by 20 % & 10% each. Prepare a statement showing total and per unit price for an order of 400 units, so as to maintain 20% profit on sales.
- IV. Differentiate between Sunk Cost and differential cost.

Prepare financial statement from the following trial balance

1x10 = 10 Marks

Particulars	Amount Debit	Amount Credit

Value of closing stock on 31st March was Rs. 50,000.

2 68,000

Q4. Answer any one question

Prepare Journal entries, Draw Ledger accounts and Prepare Trial Balance from the given transactions.

1. Bhaskar started a stationery business with an investment of Rs. 5,00,000 in cash
2. He purchased stock worth Rs. 50,000 with immediate payment
3. He also opened a bank account and deposited Rs. 2,00,000 in bank
4. He purchased necessary furniture by payment of Rs. 50,000 by cheque.
5. He also got repair work done in the shop for Rs. 15,000 in cash
6. First sale of the business was to Ravi for Rs. 40,000.
7. He further gave advance for billing machine purchase, Rs. 10000 in cash, remaining Rs. 15000 to be paid at delivery time, which is not scheduled yet.
8. He further purchased stock worth Rs. 10000 from Aditya.
9. He sold goods for Rs. 20000 in cash
10. Expenses to be paid Rent – 5000, electricity – 4000

OR

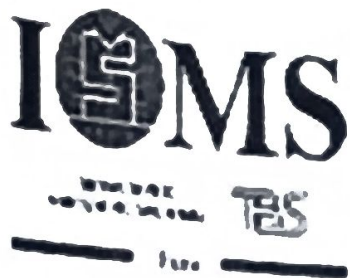

Journalize following transactions, prepare ledger and trial balance for following transactions

1. Meera started business with cash Rs. 10,00,000
2. Deposited into bank Rs. 8,00,000
3. Purchased stock for Rs. 50,000
4. Purchased furniture from M/s Geeta Interiors for Rs. 3,00,000 in credit
5. Sold goods for Rs. 3,00,000 to Mohan
6. Advance given for purchase of computer Rs. 50000 (Cost of computer Rs. 80000)
7. Purchased stock of Rs. 1,50,000 from Radha Suppliers
8. Mohan paid Rs. 2,90,000 in full and final settlement →
9. Paid to Radha suppliers Rs. 1,45,000, discount given by them Rs. 5,000
10. Paid salary to manager Arjun Rs. 20,000

Q5. Write any two short notes

2 x 5 = 10 Marks

1. Functional Budget
2. Difference between forecast and budget
3. Need of budgeting

PGDM 2025-27

Trimester Examination-Term I October 2025

Subject Name: Principals of Management

Duration: 1.30 Hrs.

Subject Code: SE-102

Max Marks: 30

Instructions:

1. Please read the questions carefully and attempt your answers.
2. All questions are compulsory.
3. Figures to the right indicate full marks.
4. Use of non-scientific calculator is permitted.

Q1. Answer Any Five Questions

1x5 = 5 Marks

- a) Define management.
- b) What is Forecasting?
- c) What is span of control?
- d) Define Leadership.
- e) What is the full form of MBO?

Q2. Answer Based on the basis of following case scenario

2x5 = 10 Marks

Jayant is working as Head Relationship Manager in the wealth management division of a private sector bank. He has created an internal environment which is conducive to the effective and efficient performance of his team of ten relationship management executives. A typical day at work in Jayant's life consists of a series of interrelated and continuous functions. He decides the targets for his department which are in line with the objectives of the organization. The future course of action for his team members is laid out well in advance. The various resources required by the relationship managers, like an iPad with GPS system, account opening forms, brochures, details of account holders etc. are made readily available to them. The executives are given sufficient authority to carry out the work assigned to them. Jayant works in close coordination with the Human Resource Manager to ensure that he can create and maintain a satisfactory and satisfied workforce in his department. Through constant guidance and motivation, Jayant inspires them to realize their full potential. He offers them various types of incentives from time to time keeping in view their diverse individual needs. Moreover, he keeps a close watch on their individual performance to ensure that they are in accordance with the standard set and takes corrective action whenever needed.

Questions:

Q.1 Identify the concept being referred to in the following line, "He has created an internal environment which is conducive to an effective and efficient performance of his team of ten relationship management executives."

Q.2 Identify and describe the various functions of the Management as identified in part (a) of the question by quoting lines from the paragraph. conducive

3 x 5 = 15 Marks

Q3. Answer any three questions

1. Explain Porter's Five Forces Model and how it contributes to competitive advantage.
2. Discuss the factors that determine the span of management.
3. How can leaders effectively resolve conflicts and negotiate during a crisis?
4. Explain the benefits and limitations of forecasting in modern organizations.

3. What is Demand Forecasting? Mention any two methods used for forecasting.
4. Describe the features of monopoly.
5. Define fixed cost and variable cost with examples.

1x10 = 10 Marks**Q3. scenario analysis with questions**

EcoFresh Ltd. is a company that produces and sells organic fruits and vegetables in a highly competitive market. The company operates in a region where multiple sellers offer similar products, and consumers are highly price-sensitive. Recently, the management observed fluctuations in demand due to changes in consumer income and market prices. Additionally, the economy is experiencing inflationary pressure, which has increased the cost of inputs like fertilizers and transportation.

To make informed decisions, the company's managerial team is analyzing the demand function for its products, considering factors like price, income, and consumer preferences. They are also evaluating how the perfect competition structure affects their pricing strategy and profit margins. Meanwhile, the rising inflation is forcing them to reconsider their cost structure and production planning.

- a. How can changes in consumer income and product price affect the demand for EcoFresh's products? (3)
- b. Identify the characteristics of perfect competition evident in EcoFresh Ltd.'s market. (5)
- c. What is inflation? Discuss its impact on EcoFresh Ltd.'s input costs and overall profitability. (2)

Q4. Answer any one question**1x10 = 10 Marks**

- a. Explain the different types of Elasticity of Demand and their managerial implications.

OR

- b. Evaluate the role of Managerial Economics in integrating demand and production analysis for strategic decision-making.

76 – 85 kgs
86 – 95 kgs
More than 95 kgs
 - c. Ratings in restaurants
 - d. Customer satisfaction is the key to organizational growth

Completely agree
Somewhat agree
Neutral
Somewhat disagree
Completely disagree
3. A consumer durable company is planning to launch a new type of Fridge. The company would like to have information about how consumers select the current necessities of a Fridge. Prepare a sample questionnaire to collect relevant data from the consumers.

ISMS TBS
PGDM 2024-26

End Trimester Examination- Term I March 2025

Subject Name: Managerial Economics

Duration: 2:00 Hrs.

Subject Code: GC 102

Max Marks: 50

Instructions:

1. Please read the questions carefully and attempt your answers
2. All questions are compulsory
3. Figures to the right indicate full marks
4. Use of non-scientific calculator is permitted

1. Multiple-Choice Questions

5 x 1 = 5 Marks

- i. Economic problem arises due to:
 - (a) Limited resources
 - (b) Unlimited wants
 - (c) Alternative uses of resources
 - (d) All of these
- ii. At the micro-level, problem of choice implies decision-making by the:
 - (a) Country
 - (b) Individual
 - (c) Government
 - (d) None of the above
- i. Which of the following is a short run law
 - (a) Law of diminishing returns
 - (b) Law of constant returns to scale
 - (c) Law increasing returns to scale
 - (d) None of these
- iii. Want satisfying power of a commodity is called:
 - (a) Consumption
 - (b) Utility
 - (c) Production
 - (d) None of these
- iv. The indifference curve analysis is based on:
 - (a) Cardinal utility approach
 - (b) Ordinal Utility approach
 - (c) Cost analysis
 - (d) Profit analysis

3 x 5 = 15 Marks

2. Answer (any Three) questions

- a) What are the determinants of demand?
- b) What are the properties of an indifference curve?
- c) Define monopolistic competition? Write its main features.
- d) What is inflation? What are the types of inflation

2 x 5 = 10 Marks

3. Case Study:

Case study: Maruti Udyog Ltd (MUL) enjoys monopoly in spare parts. Along with dealers, MUL is exploiting Maruti vehicle users. Often the vehicle user has to change the clutch plate twice in six months and has to pay Rs.3,567/-. MUL charges the price of clutch at imported cost while clutch plate is actually made by clutch auto private Ltd at Faridabad. The replacement of a silencer costs Rs.800/-. The cost of spare parts and repairs by any reckoning is three to four times compared to Ambassador or Fiat. A random sample indicates that every eighth car has a faulty clutch. In the context of defective parts and exorbitant cost of repairs, saving fuel in Maruti as compared to other auto makers is of little consequence. Maruti vehicle users in dilemma they cannot get spare parts or get their cars repaired except through Maruti Udyog or its authorized dealers. But both charge huge amounts, not giving a guarantee for a single day. MUL is thus indifferent to the genuine grievances of its customers.

Questions:

- a. Why MUL is called a monopoly? Does it enjoy monopoly in car manufacture?
- b. In what way do customers suffer from monopoly practices of MUL.

4. Answer (any One) question:

1 x 10 = 10 Marks

- a. What do you mean by elasticity of demand? Explain its types.
- b. What are the indifference Curves? Explain the properties of an indifference curve.

5. Write short notes on: (any Two)

2 x 5 = 10 Marks

- a. Indifference Curve
- b. Delphi Technique of Forecasting
- c. Gross Domestic Product (GDP)
